

The talking book
player for the visually
impaired

For your reading pleasure!

PLEXTALK[®]
PTN2 series

What is DAISY?

The DAISY format allows a person to read and navigate through talking books. Library services for visually impaired people have converted their titles into the DAISY format. In order to read DAISY formatted books, PLEXTALK has developed DAISY players since the 1990's, becoming today's world-leading provider of DAISY players.

With the PLEXTALK® PTN2

You can read the content from a CD, SD card or USB storage device, thus ensuring compatibility with existing standards. Voice guidance helps you through all the necessary actions.

The text-to-speech voice also reads text and MS-Word files. You can enjoy your books in bed and still have a good night's rest thanks to the sleep timer function.

Without the Cover

you can set bookmarks, adjust speed, use the search function, customize the player, and much more...

Shift levels and move sessions

The PTN2 Cross Cover opens up the navigation keys, allowing you to move through chapters, paragraphs or phrases.

Get there easily with the New PLEXTALK PTN2 Cross

It allows you direct access to the DAISY functionalities, whether you are reading a newspaper, magazine or book.

More intuitive operation

The cover reveals a few keys, offering only intuitive operations, such as those on a CD player.

Enjoy reading with the PLEXTALK PTN2

You can listen to DAISY books, but also to documents and music in MP3 and all other major sound formats.

→ High sound quality

The PTN2 is Hi-Fi speaker optimized to provide a clear sound, even of human voices. The rubber slot-in disc mechanism prevents the disc from scratching during inserting or ejecting.

→ Shock resistant

Even when dropped from a height of 70 cm, the internal stabilizers and rubber edges of the PTN2 absorb shocks, keeping your book player up and running.

→ Water proof

The rubber keypad offers protection against liquids.

DAISY/e-text playback

- Advanced navigation functions in heading, group, page, phrase, bookmark, album, track, level, screen, paragraph, line, sentence, spell, word or character (Depending on the content structure)
- Reading Microsoft Word DOC, plain text, html or DAISY text by text-to-speech
